

Sentes

Reclining bathing system for long term care and acute care settings

The Sentes reclining bathing system is designed to offer greater levels of versatility and enhance operating efficiencies.

KEY BENEFITS

- Sleek, elegant design that complements any bathroom setting
- Accommodates a wide variety of client needs
- Ultra-efficient, with rapid-fill technology
- Easy-to-use, one-touch operation
- Integrated shower system
- TMV3 temperature controls with anti-scald protection
- Adjustable head cushion and integral grab bar
- Battery backup
- WRAS compliant brassware
- 205kgs safe lifting weight

Capable of accommodating a variety of client needs, the Sentes bath is the ideal solution whenever the levels of care requirement vary. Its vertical raising, side-entry door also ensures easier access for bathers requiring additional assistance during transfer.

The Sentes incorporates a one-touch, tilting function that enables carers to recline the bather safely, gently immersing them in the temperature controlled water.

The Sentes comes with quick-fill technology as standard, so it not only reduces the time between re-fills, but it is also extremely economical to run with far lower levels of water usage than a traditional style bath. As a result, overall operating costs are significantly reduced, particularly in high-traffic bathroom areas.
