

INCREASE HYGIENE

PROTECT with antimicrobial BioCote®

COMPLY with CQC hygiene targets now!

A FIRST IN
SPECIALIST BATHING

An assisted bath that is integrated with BioCote® technology will provide longlasting, continuous product protection against microbes. Enhance your cleaning regimes with this unique antimicrobial solution – supplied as standard in all manufactured Gainsborough baths – to deliver the ultimate hygienic solution.

- Significantly reduces surface cross contamination
- Up to 99.99% protection against microbes, including Influenza H1N1, E.coli, and MRSA
- 24/7 continuous protection – not a coating, integrated during manufacture so cannot be wiped or worn away
- Over two decades of proven technology
- Supports stain and odour prevention
- Increases bath durability

PROVEN RESULTS FOR CQC COMPLIANCE

Evidence based data and healthcare provider feedback

During refurbishment of a nursing home in Leicester, a study was performed to compare bathrooms where one was fitted with a range of BioCote treated antimicrobial products and another with untreated, comparable products. The results generated by the presence of BioCote were compelling:

95% REDUCTION IN BACTERIA IN A NURSING HOME*

Two outpatient units provided the environments for an 18-month pilot study. Unit A was refurbished with BioCote treated products and also a number of untreated products. A similar, refurbished outpatient ward containing untreated items (Unit B) served as a control. BioCote generated a significant result:

96% REDUCTION IN BACTERIA IN A HOSPITAL ENVIRONMENT*

ENDORSED BY LEADING HEALTHCARE PROVIDERS:

"BioCote perfectly complements our care homes' infection control process. With the increased threat from microbes, the inclusion of BioCote technology delivers our carers and residents a significant advantage. No other premium supplier can deliver such a robust and advanced hygiene solution."

Four Seasons Health Care

"The integrated BioCote is a major benefit for us as our residents and staff can be confident in our hygiene standards as 99.9% of microbes cannot survive on the bathing surface. I have managed outbreaks of infection in previous jobs and fully appreciate the value delivered by antimicrobial protection especially during the winter months."

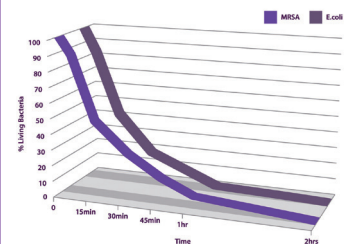

Angela Hunt, B&M Care Business Development Manager

HARMFUL EFFECTS OF MICROBES

- BATHER INFECTION
- CROSS CONTAMINATION
- CARER ILLNESS
- ODOURS AND STAINS

EFFECTIVE SURFACE PROTECTION

BioCote® technology works continuously to reduce the presence of microbes. BioCote® have a data on file to demonstrate an elimination of up to 99.99% of microbes within two hours on a treated surface, including MRSA and E.coli.

INTEGRAL PROTECTION, 24/7

Integral antimicrobial protection will not allow microbes to survive
